Dear Hans,

I hope this note finds you well. As you are aware, we have been using SWEPCO PAVRON at Karratha Aerodrome for some time now (since 1997) to cover all of our aircraft and helicopter parking bays. The product is excellent for protecting asphalt surfaces from oil and fuel spills, as well as providing moisture oxidation protection. On the occasions that fuel or oil have been spilled onto the protected surfaces, we have not had any damage to the underlying areas. Furthermore, the cleaning up of the area is much easier.

I personally have been involved in applying the product and find it easy to use with a finished product that looks great.

The Shire of Roebourne acknowledges that asphalt surfaces are a costly piece of the aerodrome infrastructure and highly recommends SWEPCO PAVRON to help cut maintenance costs and prolong the life of asphalt surfaces.

Yours sincerely,

Allan Wright
